Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.121:

- I. Claims 1-8, drawn to a plasma display panel (PDP), classified in class 313, subclass 582.
- II. Claims 9-15, drawn to a method for driving a PDP, classified in class 315, subclass 169.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method for driving the PDP can be practiced by a PDP with an area of the first electrode being smaller than that of the second electrode, or with a PDP having no protrusions on the first and second electrodes.

Because these inventions are distinct for the reasons given above, and would be a serious burden on the Examiner to search for both, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
